Width (inches)	3.0	3.5	4.0	4.5	5.0
Width (cm)	7.6	8.9	10.2	11.4	12.7

### Measurement Tips

- General**      It is ok to order the jacket in a larger size than the bib. Snosuit does not recommend ordering a jacket sized smaller than the bib  
 Make measurements while wearing the clothing you anticipate wearing under your Snosuit  
 Measuring tape should be snug but not tight  
 If a measurement is between sizes and you prefer a tighter fit, order one size smaller  
 If a measurement is between sizes and you prefer a looser fit, order one size larger
- Jacket Chest**      Measure around the chest at the widest point (about 1 inch (2.6cm) below the armpit)
- Jacket Sleeve**      Measure from the center of the back of the neck, along the shoulder, down the arm to the wrist
- Bib Waist**      Measure around the waist at the belt line
- Bib Inseam**      The 32" inseam will fit a height range from 5' 8" to 6' 2" tall, measured while wearing winter boots
- Hand Width**      Measure across the hand at knuckles with fingers together
